Enhancing ecosystem services through ecological restoration for nature and people

The countries of the Middle East – North Africa (MENA) region share crucial environmental challenges and similar, vulnerable ecosystems – heavily affected by rapid degradation, climate change, unsustainable land use planning, desertification, increasing draught and decreasing vegetation cover.

However, restoration and rehabilitation measures can successfully revive ecosystem services and introduce successful concepts for their long-term consideration in governance, policy and practice.

Take part in the 1st ESP Regional Conference for the MENA region and enjoy its multiple benefits:

- More than 20 thematic sessions covering a broad range of research areas and aspects related to the overall conference theme
- Rich diversity of presented ecosystems and MENA-specific approaches for ecosystem service integration in policy and practice
- Key factors and best practice examples for successful ecological restoration and adjunctive biodiversity conservation
- Attractive keynotes from international experts and leading restoration activists
- Discussions on shared political challenges regarding the ecosystem service approach and its mainstreaming within the MENA region
- Field trips with impressive demonstrations of restoration measures, community involvement and sustainable biodiversity use in Jordan
- Rich opportunities for regional and global exchange, cooperation and networking between researchers, conservationists, economists and decision-makers
- Opportunity to join and support the new ESP Regional Chapter for the MENA region
- Market place, poster session, integrated training and cultural presentations in the breathtaking surroundings of the Dead Sea, the lowest point on Earth!

تعزيز خدمات النظم البيئية من خلال إستعادة النظم البيئية من أجل الطبيعة والناس

تشمل القضايا التي ستثار في المؤتمر:

- التهديدات التي تواجه دول الشرق الأوسط وشمال أفريقيا من التغيرات المناخية المستمرة وتأثيراتها على النظم البيئية والمحاربات.
- تطوير مناورات تزويد المنظمات الدولية بخدمات النظم البيئية المحدثة في الأردن.
- فرصة للتعاون الدولي في مجال البيئة والتنمية المستدامة.
